MANAGEMENT DISCUSSION AND ANALYSIS REPORT

GLOBAL PHARMACEUTICAL MARKET

Global growth is projected at 3.4% in 2016 and 3.6% in 2017. The pickup in global activity is projected to be more gradual than in the October 2015 World Economic Outlook (WEO), especially in emerging market and developing economies. In 2015, global economic activity remained subdued. Growth in emerging markets and developing economies - while still accounting for over 70 percent of global growth - declined for the fifth consecutive year, while a modest recovery continued in advanced economies. Three key transitions continue to influence the global outlook: (1) The gradual slowdown and rebalancing of economic activity in China away from investment and manufacturing toward consumption and services, (2) Lower prices for energy and other commodities, and (3) A gradual tightening in monetary policy in the United States in the context of a resilient U.S. recovery as several other major advanced economy central banks continue to ease monetary policy. Manufacturing activity and trade remain weak globally, reflecting not only developments in China, but also subdued global demand and investment more broadly - notably a decline in investment in extractive industries. In addition, the dramatic decline in imports in a number of emerging market and developing economies in economic distress is also weighing heavily on global trade. Global trade flows have slowed significantly in recent months, with total volumes of imports and exports projected to grow by only 2.6 per cent in 2015, the lowest rate since the Great Recession. The source of the global slowdown in trade is primarily rooted in weaker demand from developing economies and a sharp decline in imports demanded by economies in transition. Global monetary policy has remained generally accommodative in the face of weakening growth and subdued inflationary pressures in many parts of the world. A larger-than-expected slowdown in China, the second largest economy in the world, is likely to have substantial ripple effects on the rest of the global economy.

In context with India, the full-year GDP growth for the fiscal year ending March 2016 settled at 7.6%, up from 7.3% for year March 2015, As stated in AR 2013-15 in the previous year, slightly higher than an official estimate of 7.5% (figures calculated with base year of 2011-12). The Reserve Bank of India has projected India's GDP growth for 2016-17 at 7.6%. The International Monetary Fund has slightly trimmed India's growth projections for 2016 and 2017 at 7.4%, a drop of 0.1% from its previous forecast

India: Overview, trends and prospects The Indian pharmaceuticals market is the third largest in terms of volume and thirteenth largest in terms of value, as per a report by Equity Master. Branded generics dominate the pharmaceuticals market, constituting nearly 70 to 80% of the market. India is the largest provider of generic drugs globally with the Indian generics accounting for 20% of global exports in terms of volume. India enjoys an important position in the global pharmaceuticals sector. The Indian pharmaceutical industry is estimated to grow at 20% Compound Annual Growth Rate (CAGR) over the next five years. The Indian pharma industry, which is expected to grow over 15% per annum between 2015 and 2020, will outperform the global pharma industry, which is set to grow at an annual rate of 5% in the same period. Presently the market size of the pharmaceutical industry in India stands at US\$ 20 billion. As on March 2014, Indian pharmaceutical manufacturing facilities registered with the US Food and Drug Administration (FDA) stood at 523, highest for any country outside the US. Domestic pharmaceutical market grew at a CAGR of 12 per cent year-on-year in February 2016, broadly in line with the average of 12.9% since April 2015. India's biotechnology industry comprising bio-pharmaceuticals, bio-services, bio-agriculture, bio-industry and bioinformatics is expected grow at an average growth rate of around 30% a year and reach US\$ 100 billion by 2025. The Union Cabinet has given its nod for the amendment of the existing Foreign Direct Investment (FDI) policy in the pharmaceutical sector in order to allow FDI up to 100 per cent under the automatic route for manufacturing of medical devices subject to certain conditions. The Government of India unveiled 'Pharma Vision 2020' aimed at making India a global leader in end-to-end drug manufacture. Approval time for new facilities has been reduced to boost investments. Further, the government introduced mechanisms such as the Drug Price Control Order and the National Pharmaceutical Pricing Authority to deal with the issue of affordability and availability of medicines. Some of the major initiatives taken by the government to promote the pharmaceutical sector in India are as follows: Indian Pharmaceutical Association (IPA), the professional association of pharmaceutical companies in India, plans to prepare data integrity guidelines which will help to measure and benchmark the quality of Indian companies with global peers. The Government of India plans to incentivise bulk drug manufacturers, including both state-run and private companies, to encourage 'Make in India' programme and reduce dependence on imports of active pharmaceutical ingredients (API), nearly 85 per cent of which come from China. The Department of Pharmaceuticals has set up an inter-ministerial co-ordination committee, which would periodically review, coordinate and facilitate the resolution of the issues and constraints faced by the Indian

pharmaceutical companies. As depicted in the above picture the Indian pharmaceutical market size is expected to grow to US\$ 55 billion by 2020, driven by increasing consumer spending, rapid urbanisation, and rising healthcare among others.

RISKS AND CONCERNS

Stringent regulatory norms, delay in obtaining regulatory approvals for key products, patent litigations, currency fluctuations, pricing guidelines in the domestic market are certain risks that can affect the Company's business.

Emerging markets are increasingly pivotal in the growth of the pharmaceutical industry. Pharmaceutical companies operating in these markets, whether global or domestic players, are exposed to market-specific social risks that affect public health and may also pose material financial risks.

ANNEXURE – B TO THE AUDITORS’ REPORT

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013.

We have audited the accompanying standalone financial statements of M/s. Avon Lifesciences Ltd, which comprise the balance sheet as at 31 March 2017, the statement of profit and loss and the cash flow statement for the year then ended, and a summary of significant accounting policies and other explanatory information and internal financial controls of the company.

Management’s Responsibility for Internal Financial Controls

The Company’s management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India”. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors’ Responsibility

Our responsibility is to express an opinion on the Company’s internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide

reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2017, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India".
